Percentage: 67%

EXPERIENCE

Remote work | Free-Lancing

Bhopal , India | 2023 - Present

I possess over 1 year of experience as a freelance web and app developer, working on platforms like Fiverr and Upwork. My skillset encompasses:

Front-End Development: Proficient in HTML, CSS, and JavaScript for building interactive and user-friendly web interfaces.

Content Management Systems (CMS): Utilize WordPress to create and manage dynamic websites efficiently.

UI/UX Design: Leverage Figma software to design user interfaces for software, applications, and websites tailored to client requirements.

SKILLS

Programming Languages: C++, Java, python, Data Structure

Libraries/Frameworks: java Script, Flutter, Django

Tools / Platforms: Vs Code, Android Studio, Figma, Out Systems, Git, Github

Databases: My SQL, Firebase

PROJECTS / OPEN-SOURCE

Fleet Management App

Flutter , Dart , Firebase , G-Map API

In this project, I aimed to address the real-time challenges faced by vehicle owners and drivers by developing a mobile application for fleet tracking and optimization. collects sensor data such as engine performance, fuel consumption, and driver behavior. This data is then transmitted to the fleet management app's admin panel

Front-end:- Flutter Back-end and database:- Firebase

DOC FINDER

MongoDB , Express , React , Node.js

This project aimed to address the challenges faced by patients during emergencies, particularly those who are unable to visit a hospital or access in-person doctor consultations.

Connect with doctors ,Schedule appointments,Access emergency services,Utilize additional features
